WORK EXPERIENCE

AutoCorner LLC – Full Stack Software Engineer   *May 2021 – Current*
- Full Stack Web Developer on AutoCorner CMS
  - Developed React Native Cross Platform Mobile Application with direction of senior engineers
  - Communicate with clients that are less technically inclined and converted their requests into custom modifications to design templates
  - Built a microservice for our system for users to post content from CMS directly to their business page using Facebook Graph API and AWS Lambda.

AutoCorner LLC – Technical Support   *May 2020 – May 2021*
- Remote Technical Support for AutoCorner
  - Debugging/Support of web based CMS system with remote clients across the united states
  - Managed DNS records for all new clients.
  - Basic design template modification and graphics modification with Adobe Photoshop
  - Promoted to Software Engineer after a year of working closely with Senior Engineers.

PROJECTS

AutoCorner Mobile Dealer 4   *May 2021 - Current*
- Developed and maintained a cross-platform mobile application for our company release of major updates to CMS, eliminating the need for AutoCorner to hire freelance services.
- VIN barcode/Driver's license decoding via consuming private API, photo uploads to AWS S3, CRUD operations on user content.

Facebook Social Integration   *August 2022 -September 2022*
- Developed user interface for content creation and maintenance directly from CMS system.
- Leveraged AWS Lambda to create a microservice infrastructure for facebook graph api connections.

MarkDown In Browser Editor   *December 2022 - January 2023*
- Developed a full stack application allowing users to edit markdown documents directly in the browser.
- Developed NodeJs/Express Rest API for user authentication and content creation/modification
- Deployed app via Railway cloud service and github pages.
